Education

+ Politecnico di Torino
Sept 2017 - Now
Master of Science in Computer Engineering

+ UHU - Universidad de Huelva
Feb 2016 - Jul 2016
Erasmus Plus Scholarship

+ Federico II di Napoli
Sept 2012 - Mar 2017
Bachelor in Computer Engineering

Projects

+ Final Thesis at Politecnico di Torino:
Towards self-supervised graph deep learning
Argument: Geometric Deep Learning,
Domain Generalization, Pytorch,
Convolutional Neural Networks on Graphs

+ APPetiTò - Android Application Project
Argument: Mobile Development, Android, Java
https://github.com/vintop95/mad1819_
group17_project

+ LSD Consumption Data Analysis
Argument: Statistical Learning, EDA,
Multiclass Classification Algorithms

Hobbies

+ Acting (amateur and pro experiences)

+ Volunteer at "Tutti a scuola Onlus"

+ Attitude for sports

Technical Skills

+ Machine Learning:
Extensive use of Python in ML Context,
knowledge of Deep Learning, Statistical
Learning, Pytorch, ScikitLearn.
+ Data Science:
Oracle SQL, MySQL, MongoDB,
Apache Spark, Spark Streaming, MLLib
Apache Hadoop, Google MapReduce
+ Languages:
Python, C/C++, C#, Java, Assembly
HTML, CSS, Javascript, XML
+ Other Libraries and Tools:
Android Studio, Anaconda, Jupyter
Notebook, Git, Visual Studio, LATEX,
Atom, Open3D, OpenCV, PointCloudLibrary.
